New Jersey Environmental Infrastructure Financing Program
USEPA Public Awareness of SRF Assistance Requirements

Construction of upgrades and improvements to Gloucester County Improvement Authority's (GCIA's) Leachate Pump Station and Forcemain, $6,550,803.00, were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by reducing the risks of leachate spills and accidental discharges to local waterways via truck hauling for residents and businesses in Gloucester County, New Jersey.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
